NUT TREE NURSERIES

JOHN W. HERSHEY, Owner

DOWNINGTOWN, PA.

This Nursery is National Headquarters for
Information on Scientific Tree Crop Culture.

Get Rich without plowing. Grow crops on shade trees.

“Plant until you’re Planted”

IN THE CITY—ON THE FARM—IN THE FOREST—
plant a nut tree instead of a worry.

Just 10% of the 5 billion dollar “income tax” saving put in trees will help when you’re tired plowing. J. S. Jones, of Ala. started with Chinese Chestnut. 1946, 22, 12 year old trees bore 1722 lbs. at 40¢ per lb. A 600 tree walnut orchard in Maryland returned \$8.00 a bushel on a good crop.

$$\frac{\text{Idle People}}{\text{Idle Acres}} + \frac{\text{Idle Money}}{\text{Tree Crops}} = \text{Prosperity}$$

See our booklet for description—25¢

NOTE—CHANGE OF LOCATION—The new location is—4 miles Northwest of Downingtown at Guthrieville on U.S. Route 322 (the Horseshoe Pike). Turn north at stone school house $\frac{1}{4}$ mile past Guthrieville, second place on left. Coming from the West turn left second road past the old Manor Church. NO SUNDAY BUSINESS.

Pictures and cartoons always tell a clearer, faster story than words. Study the front page until the picture sinks in.

Can a farmer continue if he only conserved his cows, chickens and seed? Conservation is negative.

Nature is positive—a creator and re-creator—producer and reproducer. Therefore to fall in with the swim of the universe—get your mind off—“this plundered planet” and start making a “New Shovel Full Of Living Soil or a State Full.” “Plant a Tree or a State Full.” Make your slogan “BETTER THINGS FOR BETTER LIVING THRU LIVING THINGS.” Let’s go America.

Outstanding Features for the Fall Season

For the first time in years we’re able to offer English, and 4 varieties of black walnuts in strong, heavy 2 yr. trees up to 8-10 ft. Take advantage of quick production by setting these large healthy trees organically grown.

I take initial step in price deflation. Reduction in chestnut prices. It’ll help you “get rich without plowing.”

To the south I say: Your land is the home of a rich farming empire without plowing. Buy what trees you can. Plant 10 trees, stout-stemmed and true, and you’ll soon have 10,000 more. May I help you?

THE HERSHEY WAY. This folks is the starting at the beginning of—growing our trees in proper soil, organically managed. Then selection of seed for understock and scions to graft with.

Next step—Remember we’re not brush peddlers. We’re selling you “quality” blood lines for superior trees in the future. If nut trees were easy to grow then every nurseryman would have them. We cut the tops—the branches—in short, “the brush” off them to balance with the roots sheared off in digging, to give them a chance to start for you. Then we dip the trees in a costly wax to keep them from drying out for you until started. And for all this you pay—often less than for cheap seedlings from others. LARGE TREES—I can’t impress on you enough the value of the larger sizes if you can afford it. For where you’re in a hurry to pasture or harvest crops. We planted little sizes in our meadows—the cattle would break throu the electric fence and break, one here, one there. This fall 6-10

ft. replants of '48 are larger than 3-4 trees planted 4 years ago, not because they didn't thrive but—because their size was too small for the cattle mauling.

See our booklet for description—25¢

THAT NUT TREE HERITAGE. The nut nurserymen are a few simple souls determined to do more than just “Peddle brush” we love to work with the hard to handle trees or to introduce trees needed for your profit. When you buy, send your order to the Nut Tree Nursery **if** you want grafted, or select trees. Our life experience is passed on to you.

BOOKLET: “How To Get Rich Without Plowing!” Don't miss sending for it—the latest in description and cultural data, 25¢.

TERMS

Prices subject to change without notice.

We like cash with order except where special terms are arranged or from old customers with good credit.

All prices f.o.b. Nursery. Orders up to \$5.00 of small size stock can be mailed—add 10% for all orders to be prepaid. We discourage Parcel Post shipment.

Express, delivers in half the time—few losses, no squawks on claims.

Our responsibility ceases when shipment has been delivered to the hands of the carrier (or transportation agency).

No order where an affidavit must accompany invoice will be considered for less than \$10.00.

Six of one variety sold at the dozen rate.

All trees cut back and waxed dipped.

Grafted Black Walnut

Bears 3 to 5 yrs.

Juglans Nigra

The Commercial Tree of the North

The thin-shelled grafted varieties. The commercial nut tree and a good partner for the Chestnut.

Thomas, the leader and all around nut.

Elmer Meyers, the more I see of this nut the better I like it. For those who like the Stabler, this will take its place—is as thin-shelled, better bearer, better kernel.

Ohio, most ornamental foliage. Best bearer with poor care.

Cornell, (my introduction) a new northern selection of Thomas seedling. Cornell says Cornell matures its nuts at Ithaca in cool summers when native trees fail. Cracks as well as the Thomas. Try them especially in the north. On northern understock.

	Each	Dozen

Bearing trees next page.

Bearing Age Walnuts

THOMAS, the leading variety, bearing age—for those wanting a specimen or an orchard quickly, these, with a little care will fill the bill. By cutting back well and wax dipping them they come out fine. 10% discount on these if called for with no packing. (Hundred rates quoted).

	Each	Dozen
12—15 ft. heavy	\$15.00	\$150.00

Black Walnut Seedlings. A Wm. Penn Tree Selection

Bears 5 to 7 years

(My Introduction—My Selection)

J. Nigra

For large commercial plantings where machines will crack them, these are the trees to plant for the home if you can't afford a grafted tree.

Remember these are not in the "just seedlings" class. Fast growers—nut nearly as good as Thomas.

Paw Paws

Asimina Triloba

Am pleased to offer seedling at the following prices. Don't have many roots but will grow with care.

	Each	Dozen
2—3 feet	\$.50	\$ 5.00
3—4 feet	1.00	10.00

Filbert Layers

Corylus Avelina

(plant two for pollination)

Bears 3 to 5 years—18 feet height

Barcellona, Pollenator, Davianna, DuChilly, do extra well in moist soils but grows anywhere.

	Each	Dozen
3—4 feet	\$1.75	\$17.50
4—5 feet	2.00	20.00

Set 20 feet apart in a block 6-8 feet for informal hedge.

See our booklet for description—25¢

Chestnuts (Chinese) *Castanea Mollissima*

Sweet, delicious, Blight resistant.

Will not thrive on damp or heavy soils.

Bears 3-5 years.

Set 40 x 40 feet for orchard, 28 per acre.

Plant two for pollination.

For years some effort has been made by individuals to select named varieties of this Chinese Chestnut (*castanea mollissima*). However, they come so nearly true from seed, we recommend the planting of seedlings for home and commercial use. A large field awaits the use of the Chestnut for marketing and hog feed. I've planted 300.

	Each	Dozen	Hundred
1—2 feet.....	\$1.10	\$11.00	\$ 80.00
2—3 feet.....	1.25	12.50	90.00
3—4 feet.....	1.75	17.50	125.00
4—5 feet.....	2.25	22.50	150.00
5—6 feet.....	2.50	25.00	175.00
6—7 feet.....	3.00	30.00	

Japanese Chestnuts—Good bearers. Large nuts.

One year, 2—3 ft, \$1.25 each; 3—4 ft., \$1.75 each

PLANTING SUGGESTIONS—Walnut-Chestnuts

I suggest you start out with a planting of walnut 60 x 60 ft. this makes 12 per acre. Then set a chestnut in each center of each square of walnut making 12 chestnuts per acre. This gives you a nice balance in space and soil use for the walnut is tall and deep rooted and the chestnut is more shallow rooted with a lower head.

Grafted Shagbarks (eastern shellbark)

Hickoria Ovata

Romig, Grainger, Lorane, Glover

	Each
6—18 inches.....	\$4.50
2—3 feet.....	5.50
3—4 feet.....	6.50
4—5 feet.....	7.00

Hickoria Hybrids

Bears 5-6 years. Beautiful ornamental thin shelled.

Fairbanks and Stratford

2—3 feet.....	3.50
3—4 feet.....	3.75

Fairbanks ONLY

4—5 feet.....	\$4.00
5—6 feet.....	4.50
6—7 feet.....	4.75

Hardy Northern Pecan—Bears 7 yrs.

H. Oliviformis

These two varieties selected over many years of observation as the best.

Greenriver, Busseron, plant two for pollination.

Hicans

A pecan X shellbark, cross

Bixby, Girardi, great large nuts.

Wright, similar to large pecan. Flavor of all high, like the shellbark. Shell thin but not as thin as pecan. Very ornamental. Wright bears 5-6 years other two, later.

	Each
1—2 feet.....	\$3.00
2—3 feet.....	3.50
3—4 feet.....	3.75

For any near-by customer who can move them balled we have many sizes of larger trees of Pecans, Hicans, Hickory, Black Walnut, and English Walnut.

SUGAR MAPLE

This remarkable crop tree, the source of the finest sugar and sirup in the world has been over-looked too long by forester and agricultural expert.

It is most beautiful, drought resistant and rapid growing. The only reason YOU haven't tapped your few trees is because it wasn't brought to your attention in our fast moving society.

Any size you wish just so you get started on your home sugar growing.

	Each	Dozen

10—12 feet.....	3.50	35.00

Honey Locust (Thornless) (*My Introduction*)

Gleditsia triacanthos inermis Sweet pods for cattle feed.

Bears 3-5 years

Famous for growth value.

The agricultural Experiment Station at Auburn, Alabama reports in their 53rd annual report these startling facts:

"Auburn's animal husbandry has found their pods equal to oats pound for pound in a dairy ration. A team of mules fed for 30 days on pods showed satisfactory results. Cows and hogs showed equal success.

"BEARING. At 5 years of age Millwood averages 58 pounds, Calhoun 26 pounds. At eight years, Millwood 200 pounds. Calhoun 60.

"Pods fall October 15th to December 30th.

"Tree interplanted to *Lespedeza serica*, cuts 2½ tons per acre annually."

Their 8 year trees bore, figured in oats value with 20 trees per acre equal 125 bushels per acre, plus a crop of hay or pasture without cost of annual field preparation, planting and harvesting. Mature trees will grow as much as 300 bushels of Oats food value per acre.

A note just in, their 9 yr. trees—bore 250 lbs.

My 300 odd trees, set 45 x 45 ft., 3 years old, in a meadow so poor you can't raise your voice on are roaring toward "that big crop per acre at maturity. See complete food analysis in 25¢ booklet.

For the city farm owner wishing to make the most out of his land with the least care here's your tree. I've set them on the worn-outest land in Tenn. and they grew and thrived. Set your pasture with these upper story forage producers.

I've seen them grow in semi swamps and with only 10 inches of rainfall in Colorado.

The small root system will make it easy for you and the Mrs. to put in a lot of them in one day.

Due to moving our nursery we're offering the middle sizes at a greatly reduced hundred rate. Take advantage of it. We find a tree over 6 ft. is 3 yrs. ahead of a 3-4 ft. size the second year. 75 at the hundred rate.

Wm. Penn Oaks—(*My Introduction*)

These are the "corn fields of the future." When man grows up to use what he has, he'll **Oak** a mountain ridge, a hill-side, a rocky knoll.

According to production figures of bearing oaks a low of 274 bus. of corn per acre in hog food value can be grown on mts. and steep slopes. You can start YOUR future tax reduction by planting NOW?

Many people insist on a black or red oak. THE WHITE is JUST as beautiful as either in the autumn with the addition of—the BEST oak timber and the BEST acorn for feeding poultry and hogs.

THE BURR stands out as a brunette in the landscape, dark, heavy large leaved, deep green foliage. Another attraction is their remarkably rapid growth AND corky bark on branches. Timber good, acorns large and sweet. Turkey odd holly leafed, very ornamental.

Wax dipped special-grown for making fine roots.

Oak Transplanted

White—Burr—Turkey

Lint white oak seedling (sweet acorn)

T.V.A. prize winner for sweetness.

These have remarkable roots and transplant well.

Persimmon *Diospyros Virginiana* all grafted

Excellent selections of the American species.

Josephine, ripens fruit after the middle of September. Sweet, delicious, yellow.

Early Golden, comes in a few days later, slightly larger, yellow.

Buhrman, large, late, solid flesh, color a dark maroon with purple bloom.

Kitch, ripe December 1st, small but delicious. This is the prune of the persimmon world. Dries on tree. So high in sugar content you can see the crystals when you break the flesh. Hangs all winter, slowly dropping to the middle of March. Greatest game food you ever saw. Up to 4 feet only.

Male tree—If your persimmons don't bear or if your planting out of the persimmon range a Poppy will make it up to 7 ft.

Bears 3-5 years.

Note sizes available in each variety.

	Each	Dozen	Hundred

CHINESE PERSIMMONS

Sheng, Great Wall, Peiping.

And now folks I'm able to offer a limited number of these excellent, marvelous wonders of Oriental horticulture. You know those large ones you like to buy on the market. These are grafted high to prevent frost burst at ground.

Not recommended hardy north of Southern Pennsylvania, Jersey, L. I., and southern Ohio, west. Extra strong trees.

	Each
4—6 feet.....	\$7.50

Pears—Blight Resistant, Budded.

Here's a family selection.

MAXINE—Resembles Bartlett—excellent. I've never hooped up this variety too much because, altho knowing it is good, couldn't proove it. Today customers of our local orchard men and others prefer it to the bartlett.

We have a nice supply this year. Plant a bunch.

WORTON SICKLE—about three-fourths size of bartlett, flavor sickle, up to 5 ft. only.

DUCHESS—A delightfully fall pear budded from an old tree that never blighted.

COLLINS VARIETY SAND PEAR

Salad pear, fruit hangs till January. Ornamental large fruit. Decorative.

PLANTING FOR FUTURE WILD-LIFE 10¢

Plants for Wildlife Feeding

We list these in the fall for planters south of the Mason and Dixon line. In the north it gives you time to figure out spring needs. Planting of small seedling in the fall where you experience heaving is bad. Wait until spring. BUT place your order now.

How to Plant a Border for Best Results in Bird Feeding

Blue print for border, \$1.00.

The ultimate effect will be an ornamental bank nearly all year—a solid hawk screen where birds can feed in safety and scoot to cover among the low bushes if attacked by predatory birds.

This is one of the most complete lists of nursery stock for wildlife ever offered. Also note the ornamental affect of this list for farm and landscape plantings.

A game program without permanent feed is futile. Adequate plantings of woody food-bearing plants is the solution.

Pitch in and help them by setting an example to the public by planting your own lands and sponsoring club plantings.
Order Early.

This stock is limited and so's game without food. How many can you use? All hard to transplant stock cut back and wax dipped to insure the highest possible survival.

Many people wish to plant a few. To be of service to all we've made the following schedule when less than a hundred is ordered.

1 to 24, double the hundred rate.

25 at the hundred rate.

For large mass planting, special rates.

And remember for parcel post orders up to \$5.00, add 10% postage.

BLUEBERRIES BLUEBERRIES

Home Grown Blueberries As You Like Them

This native American addition to our horticulture through careful cross breeding is for your enjoyment IF you follow cultural instructions carefully and prayerfully. They're the greatest thing you ever saw for returns. Having no thorns like cane berries the kiddies and wife can pick them without hurting their bare feet.

FAMILY REQUIREMENTS: One plant per person, two per person is better. Double the number for the birds, more if you wish plenty.

WHERE TO PLANT: abandoned land from sour semi swampy soil up to light hill soils or garden soils. The drier the soil the more mulch needed and watering until established. And remember they are quite attractive for lawn planting.

DISTANCE TO PLANT: five to six feet apart on row. Rows ten feet apart. How many can you use? Six sold at the doz. rate.

CULTURAL CARE: Remember they **must** have sour soil and a heavy mulch. If weeds come through pull them.

SOIL: Anything but heavy clay. If your soil is clay and you must have Blueberries then dig a hole 12 inches deep, 24 inches wide fill with woods soil or sandy loam, then plant.

MULCH: Saw dust, peat moss, oak leaves, woods mold. No manure.

FERTILIZER, anything you fertilize other trees with. For years people have yelped about keeping away from manure or organic fertilizers. Covell the father of the blueberry hybrids in his early bulletin reports remarkable results with tankage, blood, bone meal as well as the nitrates. I've tried it and had good results. I also use manure, not too rich.

PLANTING: It's a good thing to mix the soil 50-50 with the above mentioned.

CULTURAL CARE: see 25¢ booklet.

Harvesting and cracking Black Walnut.....10¢

NO NUT CRACKERS

Join the Thriving, Dynamic

PENNA. NUT GROWERS ASSOCIATION

Your membership carries the benefits of a bound report of the Annual Meeting held with the Pennsylvania Farm Show at Harrisburg in January, and a report of the Field Day held each autumn at a grower's home where nut orchard problems are discussed.

1948 a new service is introduced for the members. A Quarterly news letter made up of material gathered by the Secretary, on crop trees.

Write in your problems and successes, but don't fail to send in \$2.00 now for your membership.

**Draw check to Howard M. Oesterling, Secy-Treas.,
